DETAILED ACTION

Election/Restrictions

The amendment in this case has been received; however, upon further examination, the Examiner has acknowledged a restriction is required. According to 37 CFR 1.142 (a) a restriction can be made at any time before the final action.

Upon the receipt of an election of species, prosecution will continue with consideration of the amendment for claims that read on the elected species.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: A method of playing a game where there are alternate selections between the player and the processor wherein the winning strategy employed by the processor varies with successive selections. Claims 1-10 read on Species I.

Species II: A method of playing a game wherein a selection is received from the player, a trivia question is provided to the player, an answer is randomly selected and provided to the player, and a symbol is displayed based on the answer. Claims 11-18 read on Species II.

Species III: A method of playing a game by receiving selections from the player and then revealing a hidden symbol to be used in addition to the player selections. Claims 19-23 read on Species III.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3713

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Marks whose telephone number is (703)-305-7497. The examiner can normally be reached on Monday - Friday (7:30AM - 4:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, V. Martin-Wallace can be reached on (703)-308-1148.
